StrictionD Reviews Consumer Reports and Results

Now we are going to the main thing of this StrictionD Review, Consumer Report after 90 days of use.

Now, first of all, I would like to say this helped me to manage my blood sugar effectively and I good experience throughout the use of this supplement.

With longer use of StrictionD, My blood sugar is coming into the range and helping effectively.

I have only been taking “**StrictionD**” for a few weeks, but I can see a definite drop in my numbers from testing my blood sugar at home daily.

First, and most important I is that **my Dawn Phenomenon (DP) is now controlled**. I do not wake up in the middle of the night wet from perspiration, nor do I experience uncontrolled movement when my blood sugar level is in the middle of the night.

How wonderful it is for me to be able to fall asleep and stay asleep till morning. Most importantly, I can sleep with my wife again.

It was my choice to leave our bed so as not to wake him every night with my DP constantly. I can tell you my DP numbers would raise my sugar by 30-50 points during the night. I was very miserable and kept trying to cut my carbs to correct the situation. The first night I took one capsule of “StrictionD” before bed, I slept all night, I didn’t wake up with my PJs soaking, and I didn’t toss and turn all night.

And, my early blood sugar reading was 40 points lower than what I was used to getting. I kind of felt that this was too good to be true, but night after night taking my StrictionD supplement has stopped my DP. I am taking BBSS In the morning and one at night before bed. It is a great product, my numbers are in control, and I can’t wait to see my next A1c test. I have tried similar products, but at much higher prices and they did not control my DP.

I know it is hard to believe that one capsule before bed made such a huge difference to me in controlling my Blood Sugar and DP, but it did within 90 days only.

To all those suffering from DP, Blood sugar, this product is the real deal. I’m not saying that StrictionD will benefit everyone, but it did work for me.

But still, I recommend the **StrictionD Blood Sugar Support formula**.

Now we have read a complete **StrictionD Reviews Consumer Report**, now we need to know more about the details of this supplement.

So, let’s get started

What is behind the StrictionD?

The formula is the creation of healthy Habits, a company that manufactures many healthcare products. The company offers a variety of products, one of them which we have covered on our site is Striction BP, and there are so on others too.

healthy Habits has been operating in the market since 2001. This a very long period for a company which proves that the company provides value to the customer which is why they are in the market for a very long time.

Healthy Habits is a Family Owned Business run by Peter Ballantine, President of the company.

Here are some other details of the company:

The company makes vegan-friendly products, which means no issue with the product. Now we need to check more about this product.

Healthy Habits StrictionD Ingredients Explained

StrictionD is a composition of 5 powerful ingredients that are backed by science. I found that the ingredients make this product so effective. Let's check all 5 ingredients of StrictionD.

As we have said there are 5 different ingredients in this Blood Sugar support formula, they are:

1. **Ceylon Cinnamon (500mg):** This is an ingredient that works great against high glucose levels. This is common for Diabetes product that uses a regular type of Cinnamon (Cassia Cinnamon), this has coumarin toxins in it and works slowly for Blood Sugar. But StrictionD has the true Cinnamon which is Ceylon Cinnamon. As per diabetesjournals.org, Cinnamon is found good for the Glucose and Lipids of People With Type 2 Diabetes.
2. **Chromium (Crominex3+) (200mcg):** StrictionD contains the purified form of Chromium which is called Crominex3+. It is proven to show an effect on insulin response and enhance sensitivity by 17% to provide a healthy glucose level.
3. **Banaba Leaf (240mcg):** Banaba Leaf contains GlucoHelp, and this extract of the Banaba Leaf was found helpful for the glucose level. As per the studies, it can reduce the glucose level, and normalize blood sugar.
4. **Zinc (7.5mg):** High Blood sugar may face a deficiency of many essential nutrients including zinc. So, it is very important to maintain the level of essential nutrients in the body too for better results. A good level of Zinc helps to promote a balanced insulin response. [5]
5. **Thiamine (.75mg):** As we know people with diabetes or high blood sugar face nutrient deficiency. But the effect of Thiamine helps to promote good metabolism for the fat, protein, and very important cabs. So, the ingredient helps to manage the blood sugar level and promotes good lipid levels. [6]

As you can see, each used ingredient in StrictionD is helpful to lower blood sugar, and lipid and even helps to enhance insulin response.

There are 5 blood sugar-balancing ingredients in this formula.

In our view, it is one of the most advanced Blood Sugar Support on the market, and consumers are happy after using it.
